

Bushwalking

Notes:

- Where a [CARA activity guideline](#) exists for the activity and the minimum requirements outlined cannot be met the activity must be modified or alternative controls implemented to ensure an equivalent level of safety for staff, students and others involved.
- Where a CARA activity guideline does not exist, and when considering any other risks relevant to an activity, the [Curriculum activity risk planner](#) is to be used.

Activity Description: Bushwalking- Controlled areas up to and including Class 4 graded tracks Easy, graded tracks relates to conducting walks on formed roads or Class 1 or 2 tracks that are maintained on a regular basis and clearly signed, and where the nearest safe collecting feature can be reached within one hour's walk.

Teachers/Leaders:

Class groups:

Number of students:

Start date:

End date:

Use this risk assessment matrix as a guide to assess the [inherent risk level](#). Refer to the [Curriculum activity risk planner](#) for further details.

Likelihood	Consequence				
	1 - Insignificant	2 - Minor	3 - Moderate	4 - Major	5 - Critical
5 - Almost Certain	Medium	Medium	High	Extreme	Extreme
4 - Likely	Low	Medium	High	High	Extreme
3 - Possible	Low	Medium	High	High	High
2 - Unlikely	Low	Low	Medium	Medium	High
1 - Rare	Low	Low	Low	Low	Medium

Indicate the assessed risk level and undertake the actions required for that level of risk.

Inherent risk level			Action required
<input type="checkbox"/>	Low	Little chance of incident or injury	<ul style="list-style-type: none"> • Manage risk through regular planning processes.
<input checked="" type="checkbox"/>	Medium	Some chance of an incident and injury requiring first aid	<ul style="list-style-type: none"> • Document risks and controls in regular planning documents. • Manage risk through regular planning processes OR complete this <i>Curriculum Activity Risk Assessment</i>.
<input type="checkbox"/>	High	Likely chance of a significant incident and injury requiring medical treatment	<ul style="list-style-type: none"> • A <i>Curriculum Activity Risk Assessment</i> is required to be completed. • Principal or head of program (i.e. DP, HOD, HOSSES) approval is required prior to conducting this activity. • Parent/carer consent is recommended. • Once approved, activity details are to be entered into the School curriculum activity register.
<input type="checkbox"/>	Extreme	High chance of a serious incident resulting in highly debilitating injury	<ul style="list-style-type: none"> • Consider conducting an alternative activity or modifications to the activity that could achieve comparable learning outcomes. • A <i>Curriculum Activity Risk Assessment</i> must be completed. • Principal approval is required prior to conducting this activity. • Parent/carer consent must be obtained for student participation. • Once approved, activity details are to be entered into the School curriculum activity register.

NOTE: If the activity is to be held off-site, parent/carer consent is required irrespective of the inherent risk level. Refer to the [School Excursions](#) procedure for the Excursion planner template.

Planning considerations

Incorporate the following factors when planning risk management strategies for this activity.

Which students will be involved?

- The number of participants, size of student groups and students' capabilities is considered e.g. age, experience, competence, fitness, maturity.
- Any individual participant needs e.g. personalised learning, support provisions is considered (including behaviour support plans), health management (including health plans and prescribed medication requirements) that may require additional supervision ratios or identification (including uniforms, hats and/or high visibility wrist bands).

Where will the students be?

- The location of the activity is considered e.g. remote/easily accessible, public /private, school/classroom/workshop or other.
- The number of participants is appropriate for the available space.
- If outdoors – sunsafe strategies are implemented; weather and environmental conditions are assessed before and during activity (e.g. temperature, storms, water currents, tides); and strategies to reduce the likelihood of viruses, allergies and skin infections caused by insects (e.g. ticks, mosquitoes, spiders) and other animals are applied.
- The site is checked for hazards (e.g. poisonous plants, dangerous animals, uneven terrain, barbed wire) and necessary controls implemented.
- The nature of the activity is considered to ascertain whether safety/exclusion zones or spectator zones are appropriate.
- Activities are appropriately situated in relation to buildings, pedestrians, members of the public, vehicles and other activities e.g. designated areas for activity, spectators and vehicles are established.

What will the students be doing?

- The nature and duration of the activity is considered i.e. need for drinking water, food, rest, appropriate clothing, warm-up and warm-down.
- Instruction in rules, pre-requisite skills and safety procedures is provided to participants.
- Student skills are developed in a progressive and sequential manner.
- First aid and emergency medical treatment provisions are appropriate for the type of activity and location e.g. first aid kit, first aid trained personnel, Ventolin®, Epipen®, and students' personal prescribed medications as required in health plans are available.
- Emergency response strategies are in place that include, but not limited to, communication plans (e.g. mobile phone, walkie talkie), safety induction, evacuation plans.
- Hair, clothing, footwear and jewellery are worn in a manner that is appropriate and safe for the activity.
- Personal items, e.g. drink bottles, towels and mouthguards, are not shared between participants.

What will the students be using?

- Instruction in safety procedures and safe handling of equipment is provided.
- All equipment (including protective equipment) is suitable for the activity, properly maintained, appropriately used and complies with the relevant safety standard.
- Relevant [department procedures and guidelines](#) are adhered to for the use of equipment, compliance of equipment and appropriate work processes.

Who will be leading the activity?

- A registered teacher will have overall responsibility for the activity.
- Sufficient adult supervision is in place to manage the activity safely (including in emergency situations).
- The activity leader has the expertise (formal qualifications) or competence (knowledge and skills) to plan, induct, instruct and manage the activity safely for participants and others.
- There are sufficient supervisors present with current First Aid qualifications (including CPR) or ready access to qualified first aid personnel.
- A safety induction session (including designation of roles) is conducted with all supervisors prior to the commencement of the activity outlining risk management processes and emergency response strategies for the activity.
- Supervisors are active in their supervision, visible and are readily identifiable to participants.
- Blue Card requirements are adhered to for all supervising leaders/volunteers.

- I have incorporated the above factors when planning my risk management strategies for this activity.
- Additional activity-specific requirements for participants with specialised learning needs are provided in the Other Details box below.

Other Details:

Where a [CARA activity guideline](#) exists, ensure the minimum requirements are met.
Check if relevant Codes of Practice/Guidelines exist for each activity.
Consider any other information relevant to the safety of staff and students when conducting this activity and document below.

Where a CARA activity guideline exists:

- I have met the minimum requirements specified in the attached CARA activity guideline/s;
OR
 For each minimum requirement not achieved I have modified the activity or provided alternative controls to ensure an equivalent level of safety as the minimum requirements in the attached CARA activity guideline/s. Information relevant to how this will be achieved is provided below in the respective boxes.

Where a CARA activity guideline does not exist:

- I have identified the hazards and risks relevant to this activity and provided information below in the respective boxes about the risk management strategies that will be implemented to ensure the safety of students and others.

Mandatory/Special Requirements

Where hazardous chemicals are used or generated by the activity (e.g. dust, gas, fumes), complete the [Chemical Hazards in the Curriculum template](#) and attach it to this risk assessment.

Note: Where the overall risk level conclusion for the use of a hazardous chemical is extreme, the activity must not proceed, as risks are not effectively controlled.

Provide information about any mandatory or special requirements for each activity that is to occur:
<p>Age, size, ability and maturity of students must be considered when determining suitability to undertake physical activities</p> <p>Refer to Queensland Adventure Activity Standards and the Rural Fire Service when planning this activity.</p>

Supervision Requirements

Provide information about supervision for each activity that is to occur:

Designated group roles (e.g. leader, group member, first aid officer, tail end).

A management plan for the administering of prescription medications (e.g. asthma puffer) to students.

Leaders who are familiar with the intended route, the program, sources of drinking water, their role in the program and emergency procedures to be used.

Regular checks on group numbers to ensure that contact between all group members is maintained.

Qualification Requirements

Provide information about the leader/supervisor's relevant qualifications and/or competence for each activity that is to occur:

Supervisors should have demonstrated skills and currency that meet leadership, group management, technical capacities and safety requirements (including current familiarity with the environment, map coverage of the area and emergency procedures) of the specific circumstances being addressed.

Equipment/Facility Requirements

Provide information about equipment/facilities for each activity that is to occur:

An appointed first aid officer with: a first aid kit suitable for the activity and the experience to use it effectively; a medical alert list collated from information on medical consent forms before departure and to be carried at all times; a first aid register, accident and illness reports; procedures for administering student medication; and a communication procedure for external assistance if required.

Route Information and Pickup Point

Effective communication system including a communication device that will work in the relevant conditions -mobile phone.

Personal equipment for all participants including (but not limited to): Day pack with individual drinking containers with each student carrying 2 – 3 litres of water; protective clothing (long-sleeved shirt and pants for all weather extremes, wind and rain jacket, suitable footwear and clothes for swimming if appropriate); - insect repellent, sunscreen and personal hygiene items as necessary;

Hazards and Control Measures

Information on managing common hazards and risks in the school environment can be found at [Hazards and Risks](#).

Provide information about:	
<ul style="list-style-type: none"> Hazards: 	<ul style="list-style-type: none"> Planned control measures:
Biological material	<p>Brief all participants about the nature and purpose of the activity, potential hazards</p> <p>Brief all participants on basic first aid procedures for biological hazards they may encounter (eg mosquitoes, sandflies)</p>

Provide information about:	
<ul style="list-style-type: none"> • Hazards: 	<ul style="list-style-type: none"> • Planned control measures:
Environmental conditions	<p>Assess the weather , plan and ensure all supervisors and students are prepared for a range of emergencies (e.g. lost member of a group, medical emergency, storm).</p> <p>Plan alternative routes in case of emergency situations (e.g. bushfire, thunderstorm, extreme temperature, king tide).</p> <p>Constantly monitor surroundings for weather, terrain and wildlife hazards during the bushwalk. Adjust and enact emergency procedures accordingly to prevent catastrophic consequences. Ensure that minimal environmental impact message is conveyed (e.g waste disposal, trampling vegetation).</p>
Equipment	<p>Ensure students are aware of the location of emergency and first-aid equipment. Ensure suitable communication is available and in working order. Consider mobile phone network access, battery and waterproof casing.</p> <p>Ensure clothing appropriate to the activity is worn by all participants and includes appropriate clothing for all weather extremes (e.g. sturdy walking shoes, sun protection when in open areas, shoes when swimming in creeks).</p>
Student considerations	<p>Review health, maturity, fitness, suitability and competency of participating students. Record individual student medical conditions and brief staff on any student health plans. Ensure all leaders are familiar with the route to be taken, the program, their role in the program and emergency procedures to be used. Provide supervision of the group through measures such as designating group roles (e.g. leader, group member, tail end). Brief all participants on appropriate behaviours to help keep themselves safe on the bushwalk (e.g. stick to the path, maintain a reasonable walking speed). Brief all participants on the procedure to be followed should a participant become separated or lost from the group.</p>
